TRAPPER

BASKET STRAINER

The Trapper, a robust pipeline basket strainer, is designed to protect pumps and other industrial equipment by screening solids that are carried in the liquid stream. Easily fitted into any piping system, the Trapper has four sizes to meet most flow requirements, namely: 50mm, 80mm, 100mm and 150mm.

TRAPPER FEATURES

- Standard filters can withstand pressure up to 10 bar
- Custom designed filters are available to meet higher pressure requirements
- Horizontal or vertical design options are available to suit piping structures
- Quick release bolts for easy access to the basket
- Housing Material - Mild Steel or Stainless Steel

OPTIONAL TRAPPER BASKET

- Basket material
- Stainless Steel
- Optional
- Pressure Gauges can be fitted on both Inlet and Outlet pipes
- Optional - Support stand can be fitted to meet a specific requirements
